Apple Stock Price Forecasting (AAPL)

Stock Price Prediction

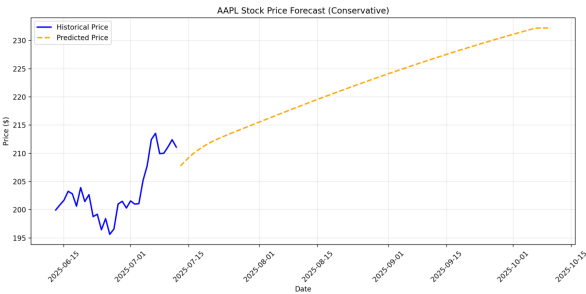

This model uses LSTM neural networks trained on historical AAPL data to predict future stock prices.

About This Model

Model Type:

LSTM Neural
Network

Training

Data:

Historical
AAPL stock
prices

Features

Used:

- Closing
prices
- Technical
indicators
- Time
series
patterns

Conservative

Limits:

- High
Confidence:
±10% max
change
- Medium
Confidence:
±15% max
change
- Low
Confidence:
±25% max
change

Disclaimer:

This is for
educational
purposes
only. Stock
predictions
are inherently
uncertain and
should not be
used as

financial
advice.
